

MyBIMA

Your one stop shop for insurance

The Problem

Insurance products are still sold through conventional channels which require customers to physically engage with insurance companies & their brokerage agencies.

Acquiring these insurance products is time consuming and involves filling physical forms.

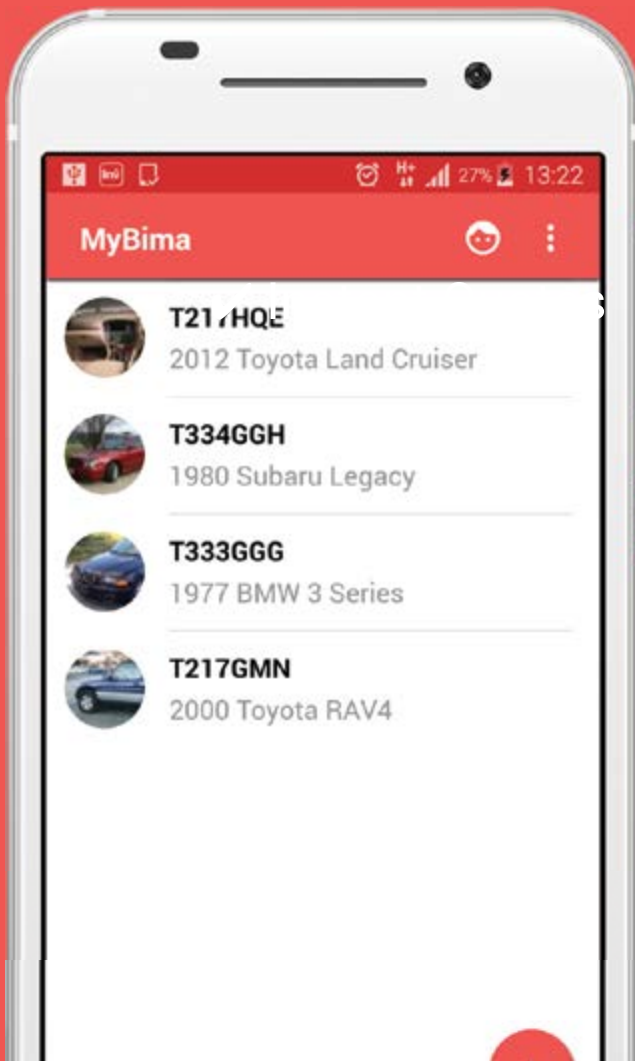

Payment for insurance products is still through physical cash or bank deposits. This is time consuming and cumbersome.

This limited access to insurance products leads to low incentives for potential & existing clients to acquire more insurance products.

Our Solution

Our users can compare premiums from multiple insurers, and then pay for & manage their plans; all within one app!

We close the gap between the user and insurance providers, allowing for a seamless experience for both parties.

Key Features

- ✓ Compare Quotes from different insurers
- ✓ Mobile Payment
- ✓ Free Sticker Delivery
- ✓ In-App Claims
